

Principles of Science at St Marie's Catholic Primary school.

Science is good when...

- Our science lessons are fun and exciting.
- When we are engaged and enthused in our science learning.
- When our science lessons are hands on using practical resources.
- When we meet and learn about real scientists.
- When we are actively independent, working scientifically and we suggest questions to investigate and carry out these confidently.
- When we are working collaboratively.
- We talk about science in the real world.
